

Message for my Sponsor At project, I have learnt so many things like planting in containers. I got to know I can plant in containers where there are no soils and even flowers in water. Do you know about this method?

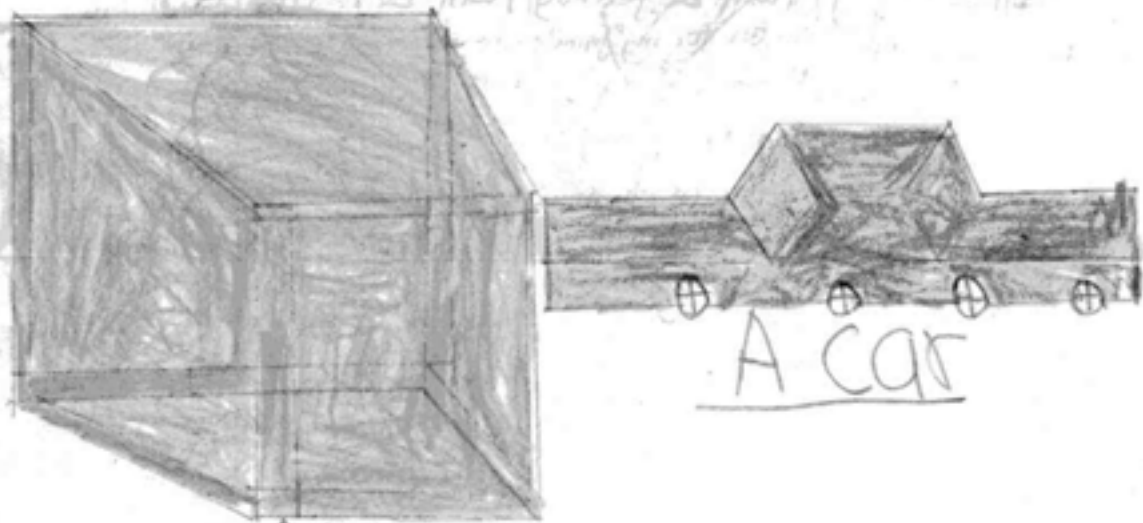

Question for my sponsor Do you know any other method of planting when there are no soils? How are you and your family?

Prayer for my sponsor It is my prayer that God who protects me will protect you, guide you and establish anything you touch.

Prayer request from child Please, pray for me to do very well through my education and also excel in my academics.
